

Remarks

Receipt is acknowledged of the Office Action of February 22, 2005. Reconsideration of the application is respectfully requested. It is believed that the application defines patentable and allowable subject matter. In the absence of an uncovering by the Primary Examiner of more relevant prior art, the present invention, as now claimed, is not anticipated nor obvious. The claimed invention, when considered as a whole, as it must, is a patentable advance over the prior art, either when the art is individually considered or even if combined together. The art of record neither impliedly nor expressly teaches the invention defined by the claims now of record. The basis of rejection of the application, on grounds of indefiniteness have been obviated. Thus the objection to the claims should now be withdrawn.

Prompt and favorable action is earnestly solicited and believed to be fully warranted.

Dated: May 20, 2005

Respectfully submitted,

Andrew S. Langsam
